File: Monthly-Connect_template_new

Date: 22-12-2025

Score: 9/10

Question 1: What is the primary focus of the OpenXR application described in the text?

- A. Game development
- B. Virtual Reality device drivers
- C. Overlay support
- D. 3D modeling

Explanation: The 'Worklet Details' section explicitly states 'Successfully implemented the core OpenXR application with overlay support'.

Question 2: How many distinct overlay sessions were implemented in the application?

- A. 1
- B. 2
- C. 3
- D. 4

Explanation: The text mentions, 'Exceeded the requirement of 2 overlay sessions by implementing 3 distinct overlays'.

Question 3: Which OpenXR runtime was the application fully integrated with?

- A. SteamVR
- B. Oculus Runtime
- C. **Monado**
- D. Viveport

Explanation: The 'Worklet Details' section states, 'Fully integrated with the Monado OpenXR runtime'.

Question 4: What specific OpenXR extension was successfully implemented in this project?

- A. XR_KHR_vulkan_enable
- B. **XR_EXTX_overlay**
- C. XR_MSFT_hand_interaction
- D. XR_FB_color_space

Explanation: The 'Worklet Name' and 'KPIs achieved' sections explicitly mention the XR_EXTX_overlay extension.

Question 5: What method was used for session layer placement in the OpenXR application?

- A. XrSessionLayersConfig
- B. XrSessionPlacementInfo
- C. **XrSessionCreateInfoOverlayEXTX**
- D. XrOverlayLayerSetup

Explanation: The text states, 'Properly implemented session layer placement using XrSessionCreateInfoOverlayEXTX'.

Question 6: What was a key challenge faced regarding Android-Native Integration?

- A. Limited Android API documentation
- B. Lack of suitable native libraries
- C. Setting up complex build system with Gradle/CMake
- D. Insufficient device compatibility

Explanation: Under 'Any Challenges/ Issues faced,' it lists 'Android-Native Integration - Setting up complex build system with both Gradle (Android) and CMake (C++) while ensuring proper JNI bindings'.

Question 7: What technique was implemented for transparent overlay compositing during advanced OpenXR-Monado-XR_EXTX integration?

- A. Alpha masking
- B. Stenciling
- C. Blending
- D. Color Keying

Explanation: Under 'KPIs achieved,' it states 'implementing blending for transparent overlay compositing'.

Question 8: What are the two primary build systems mentioned for Android-Native integration?

- A. Maven and Ant
- B. CMake and Make
- C. Gradle and CMake
- D. Bazel and Ninja

Explanation: Under 'Any Challenges/ Issues faced,' it mentions 'Android-Native Integration - Setting up complex build system with both Gradle (Android) and CMake (C++)'.

Question 9: Which software resource is identified for development, debugging, and deployment?

- A. VS Code
- B. Eclipse IDE
- C. Android Studio IDE
- D. Xcode

Explanation: Under 'Software Resources,' it lists 'Android Studio IDE – for development, debugging, and deployment'.

Question 10: What is the Worklet ID for this project?

- A. RV_25IX05RV
- B. SRIB-PRISM
- C. 25IX05RV
- D. OpenXR_Overlay_App

Explanation: The 'Worklet ID' is explicitly stated as '25IX05RV' multiple times in the text.
